

HV Service health and developmental reviews

The **Oxfordshire Health Visiting Service** is now offering your child's 1st year and 2 – 2 ½ year health and development review in a new way - 121 time with a health professional and a health promotion session with other parents.

Our health and development sessions offer an opportunity to talk individually through different aspects of your child's health and development with a member of the HV team, as well as a time of evidence-based health promotion advice alongside other parents. This has proved a great way to discuss individual concerns as well as sharing experiences with other parents who have children a similar age.

If your child is now due a health review, please look out for your invite.

I really feel that the environment today was fab and can see how well it will work in future.

I liked that it was in a group as you could discuss matters together and gain ideas/advice from other peoples experiences as well as the professionals advice.
